PHOTOGRAPHY TIPS & TRICK

- Lightning is the first component in photography.
- Composition & framing is the second component.
- Camera setting and the concept of ISO, Aperture and Shutter speed.

10 PHOTOGRAPHIC TECHNIQUES

- Shutter speed is high to capture long exposers (blurry photo & night shots) and low to capture short exposers (freeze motion & sports shots).
- ISO value less for sunny condition and high for night condition.
- Aperture less shot becomes bright and if it is high shot becomes dark.
